With a roller factor of 10, all four of these musical gems ooze afternoons in the park, cloudless skies, beers on the balcony, and cosmic dancing...

#### A. FAIBLE - 'NORTHERN LIGHTS' FEAT. IRIANN JOYCE

Austrian producer **Faible** kicks off the EP with a jazz infused deep vocal roller. *'Northern Lights'* pulls you gently through a rich soundscape of piano arrangements encapsulating a warm summertime bass - all nicely wrapped up in the radiant and angelic vocals of Venezuelan vocalist **Iriann Joyce**. This is a hit of pure Latin heat.

#### B. D.A, CLART & MSDOS - 'DISCO INFERNO'

NexGen captain and chief **D.A** teams up with **Clart & mSdoS** to produce a blistering rework that sweats pure melody, while igniting the burning passion of drum and bass deep within your soul. *'Disco Inferno'* meanders through your speakers like a warm summer breeze whilst the jazz guitar takes charge of your music journey, courtesy of renowned New York multiple jazz musician of the year award recipient **Greg Diamond**. The drop delivers a punching heavyweight sub along with some funky breaks to keep you on your toes. This piece is put simply - magic.

#### C. PHYSICAL ILLUSION & SUNNY CRIMEA - 'SOMETHING ABOUT LOVE'

Ukraine is fast becoming a huge nation of talented drum & bass producers and **Physical Illusion** and **Sunny Crimea** are definitely considered to be a part of that wave. *'Something About Love'* is smooth, light and airy, with crisp and luscious drums and percussion that collide into the hypnotic chords of a rhodes keyboard. Feel the sun in this delightful musical piece shine down on you, while tantalizing vocals suck you even deeper into your musical consciousness. *'Something About Love'* is the perfect soundtrack to your summer.

#### D. REBORN - 'MARIO IN COMPUTER HELL'

On a different level to the rest of the EP, **Reborn's** *'Mario in Computer Hell'*, takes you down an strange path somewhere inside the deep depths of Nintendo land. With expertly composed 80's & 90's synths and pads, mixed in with 8 bit chops, drops, and melodies - this piece leaves you feeling like you're trapped in "load-mode" with your joystick all in a twist.
